Office Action Summary	Application No. 10/685,771	Applicant(s) BINGHAM ET AL.	
	Examiner Timothy C. Vanoy	Art Unit 1754	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 05 January 2006.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION***Specification***

The amendment filed on Jan. 5, 2006 is objected to under 35 U.S.C. 132(a) because it introduces new matter into the disclosure. 35 U.S.C. 132(a) states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: In the abstract, the statement that the hydrogen is at a pressure that is greater than about 100 pounds per square inch of pressure is new matter. Original claim 8 sets forth that the **liquid** pressure is greater than about 100 pounds per square inch, but this does not support the amendment that the hydrogen **gas** is at a pressure than is greater than about 100 pounds per square inch as set forth in the amendment to the abstract.

Applicant is required to cancel the new matter in the reply to this Office Action.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

- a) Claims 7, 10, 14, 15, 18, 19, 21 and 22 are again rejected under 35 U.S.C. 112, first paragraph, as based on a disclosure which is not enabling. It is critical or essential to the practice of the invention for either the specification of the claims to define the "inert fluid" of claim 7; the "second fluid stream" of claim 10; the "substantially inert fluid" of claim 14; the "second fluid stream" of claim 15; the "fluid stream" of claims 18, 19 and

Art Unit: 1754

22; and the "substantially inert carrier fluid" of claim 21, but neither the specification or the claims provide any examples or definitions of these vague and indefinite terms. See *In re Mayhew*, 527 F.2d 1229, 188 USPQ 356 (CCPA 1976).

Response to Arguments

a) *The applicants comment in their amendment filed on Jan. 5, 2006 that they have amended to the paragraph no. 0021 in the specification to indicate that the substantially inert fluid is any liquid which is not adversely chemically reactive with the reactive compound 40.*

The rejection is maintained because the applicants' disclosure is an invitation for one skilled in the art to unduly experiment in order to determine exactly what these fluids are that are not chemically reactive with the reactant compound. The rejection is maintained because the applicants have not provided any specific examples of the inert fluid. The applicants' specification and claims raise the question: exactly what are these inert fluids that do not react with the reactant?

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within

Art Unit: 1754

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
